Organizational Optimization Maturity Assessment

The Optimization Maturity Assessment allows for organizations to quantify the current state of their strategic performance based on the Organizational Optimization Model for strategic alignment and execution. The assessment provides leaders a road map from current state to Optimization.

Why is it Different

This Maturity Assessment is based on key categories described in Organizational Optimization Framework. That framework includes a future state vision, a goal and several objectives for each of the key categories. Using advanced surveying techniques, a set of critical questions is used to test how well the organization is meeting these objectives. The survey results are mapped to Organizational Optimization categories to identify the critical areas in which to focus on to improve your organization's performance.

What's in it for You?

Our Organizational Optimization Maturity Assessment is a proven method of getting an unbiased, true reading of where you currently operate in your Optimization journey. More importantly, this framework will lead to a customized plan of action to take your organization to a higher level of aligned performance. In other words, the Organizational Optimization Maturity Assessment:

- Sharpens the focus on the strategic alignment and strategic execution capability of the organization to a state of optimization.
- Allows you to lay out an improvement path to achieve optimization maturity.
- Provides clear direction for the Organizational Change Leadership program.

OUR CONSULTANTS

Optimize consultants have extensive experience assessing strategic and operational performance of commercial organizations and federal agencies. Moreover, these consultants have defined and refined the Organizational Optimization Model over course of several years, and thus have a thorough understanding and appreciation of Maturity Assessment best practice and the interpretation of survey results.
